WORK EXPERIENCE

CATERING MAK JAH - WAITER
Jun 2025 – July 2025
Provides courteous and efficient table service by delivering food and beverages to customers. Ensures orders are accurate, timely, and meet established quality standards. Maintains a clean and organized service area while supporting overall guest satisfaction

DIPLOMA PROJECTS

Secondary School Attendance Management System – Window Application (VB.Net Programming)
July 2025 – November 2025
that streamlined the process of tracking, recording, and managing student attendance. The application was designed with a user-friendly interface to simplify daily operations for teachers and administrators. Integrated a secure database system to store and retrieve attendance records accurately and efficiently. Applied strong skills in software development, database management, and problem-solving to ensure the system's reliability and performance. The project demonstrated the ability to deliver a complete solution that improved accuracy, reduced manual workload, and enhanced school record management.

Satay Kajang Uncle Ujang Ordering System – Website (HTML, PHP, JavaScript, CSS)
July 2025 – November 2025
Developed an ordering system website with features such as menu display, ordering, admin management, staff management, and applied a user-friendly interface that customer would understand and navigate the website. We also use workflow management tools such as using GitHub Desktop and Trello to manages a smooth flow and efficiency of the project. The final product demonstrated strong skills in web development, system design, and project coordination, tailored to real business needs.

MySQL(phpMyAdmin)

Project Management System
Trello, GitHub, GitHub Desktop
